

Recursion Practice

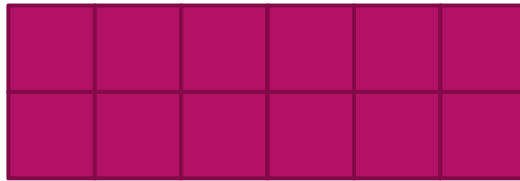

Recursion Practice:

1. trace the computation for the tower of Hanoi like P.3

2. Find the number of ways a $2 \times n$ rectangle can be tiled with rectangular tiles of size 2×1

2×1

2×6

Practice (Optional):

3. Enter a string and print out all permutations of the characters in the string.

Example:

Input: abc

Output: abc, acb, bac, bca, cab, cba

4. Enter a string and print out all combinations of the characters in the string.

Example:

Input: abc

Output: a, b, c, ab, bc, ac, abc

The practice will be checked in this lab class or the next lab class (before **Mar.15**) by teachers or SAs.

Question 3 and 4 are optional, just describe ideas, don't have to write code.

This practice will contribute **1 mark** to your overall grade. Late submissions within 2 weeks after the deadline (Mar.15) will incur a 20% penalty, meaning that you can only get 80% of the score.
